Full Stack Developer | Future Software Architect

Cape Town, South Africa • malakakatlego67@gmail.com • github.com/KJMalaka • linkedin.com/in/katlego-jeffrey-malaka-820a8726a

Final-year Full Stack Developer at CPUT (graduating 2026) with two national hackathon podium finishes. Ships production-grade systems end-to-end across React, Node.js, Java, and Python, and led a 4-person team to a 2nd-place finish against top Western Cape universities. Headed toward Software Architect.

FEATURED PROJECT

QueUp — Civic Tech Queue Management Platform 2nd Place • MICT SETA National Skills Challenge 2026 (Western Cape Regional)

- Led “Abantu Tech,” a 4-person team, from concept to a deployed product — competing against top Western Cape universities and colleges.
- Architected the full stack: React frontend, Node.js/Express API, PostgreSQL database, and real-time queue updates.
- Designed role-based access so citizens join queues remotely from their phones and admins manage them — tackling a real civic problem costing South Africans thousands of hours a year in clinic, Home Affairs, and government-office queues.
